

Tax optimization

Almost all businesses are run with the wrong company structure from a tax perspective.

Do not throw more money at the state than is absolutely necessary. We can help you set up your company with the right legal structure.

There is no one country that is optimal for every start-up. Often a company structure even has to be set up across several countries in order to benefit from certain advantages (e.g. parent-subsidiary privilege, double taxation treaties, nesting privilege, ...).

We incorporate companies in numerous countries worldwide, most notably in the UK, Ireland, Switzerland, and the USA.

Contact us, we will be happy to advise you!
