

# SourceWeb® Antigen Self Test

## Officially recognized in the EU as a lay test (with CE seal).

This rapid, single-use test is used for the determination of coronavirus antigen. The sample is taken from a human nasal swab. The Corona Rapid Test is used as a rapid test for suspected coronavirus cases. This test can also be used for reconfirmation for nucleic acid detection in discharged patients. This test has CE approval for lay use (self-testing) for the detection of SARS-CoV-2 and is also listed with the BfArM, as well as evaluated by the Paul Ehrlich Institute.

## **Special features:**

- Rapid result 15-20 minutes
- Easy to use even by laymen All in one kit
- Hygienically individually packaged test kits
